Professional Summary

Full-stack software developer with three years of full-time, cross-stack leadership experience at Fordham University, preceded by five years as a front-end engineer. Skilled in designing, building, and maintaining web applications across the front-end, back-end, and supporting network and security infrastructures, with a consistent track record of leading teams and projects to complete cross-departmental initiatives. Strong collaborative and communicative skills, especially pertaining to university and vendor relationships and initiatives. Core strengths include full-stack development, database integrations, CI/CD pipeline optimizations, and network and security infrastructure management.

Professional Experience

Full-Stack Software Developer

October 2023 – Present

Fordham University – New York, NY

- Serves as a project lead on full-stack initiatives, coordinating priority system upgrades and application implementations on a university-wide scale, while reporting to the Vice President of Developer Operations and the Web Team Supervisor.
- Designs, builds, and maintains full-stack applications and services on AWS, Azure, and Google Cloud, while optimizing network and security rules on Cloudflare.
- Communicates technical direction, project status, and risks to clients and vendors, and collaborates to identify potential new solutions and tools.

Front-End Engineer

October 2018 – August 2023

Fordham University – New York, NY

- Implemented and maintained HTML, CSS, JavaScript, and PHP updates across university web services, while completing undergraduate and graduate coursework.
- Identified and resolved web and document accessibility issues to improve compliance and usability, while simultaneously improving search engine optimization.
- Oversaw and lead content migration efforts between content management systems, namely coordinating timelines and quality checks across involved teams.
